

NODE-BT

Bluetooth® Battery-Operated Controller
with Wireless App Management

Hunter®

STAY OUT OF THE VALVE BOX

WITH THE HUNTER NODE-BT CONTROLLER

Avoid the valve box with the NODE-BT Bluetooth Battery-Operated Controller! The NODE-BT is enabled with powerful wireless technology that can be easily managed from a smartphone. Total app control removes the task of opening dirty valve boxes and programming irrigation schedules on a dark screen.

Bluetooth Technology

Allows up to 50' wireless range for easy programming, site management, and remote control

Waterproof Performance

Can function in up to 12' of water

Moisture-Sensing Control

Shuts down irrigation when desired moisture level has been reached

Run Times in Seconds

Perfect for seed germination and drip systems

Keep a lid on it! Control from outside the valve box. Only open the valve lid when necessary.

NODE-BT

Bluetooth Battery-Operated Controller

For versatility during installation, the controller is mountable in five unique ways. You can also enable irrigation and check battery status right on the controller with the touch of a button, greatly speeding up maintenance.

Know Station Status

Active station LED indicators

Quick Manual Start

Start and stop station without dirtying your smartphone

Quick Battery Check Button

LED flashes red or green to indicate battery health at a glance

Rain or Clik Sensor Ready

Attach a Hunter Mini-Clik® or Rain-Clik® Sensor for maximum water savings

Soil Moisture Sensor Ready

Attach a Hunter SC-Probe for instant moisture detection and irrigation suspension

DC-Latching Solenoid Station Wires

DC solenoid wires extend up to 100', Station 1 on multi-station models is P/MV capable

Double O-Ring Seal

IP68 waterproof, submersible up to 12'

Redesigned Drop-in Battery Compartment

No more finicky wire snaps, and two 9 V batteries will last over a season

Solar Power Capable

Optional solar recharging kit provides a sustainable solution to annual battery replacement

The NODE-BT Controller is available in 1-, 2-, and 4-station models

TOTAL WIRELESS MANAGEMENT

FROM THE PALM OF YOUR HAND

The **NODE-BT** is controlled by a multi-language smartphone app. The app maps controllers by location and sends battery-change reminders. Controllers can also be configured offline, which makes field adjustments quick and easy to deploy at a later time. Run-time flexibility is perfect for germinating seeds or other agricultural applications.

Download the free Hunter NODE-BT App to a smartphone device.

NODE-BT App: Key Benefits

- Remotely manage unlimited NODE-BT Controllers up to 50' away
- Manually start, stop, or suspend irrigation for up to 99 days
- Configure watering schedules with 3 programs and 8 start times each
- Activate rain or soil moisture sensors, and set monthly seasonal adjustment parameters
- See controller status, total watering and next start times, watering calendar, and irrigation logs
- View battery health and signal status
- Set battery-change reminders every 3, 6, 9, or 12 months
- Pin controllers on a map for faster location
- Copy and paste schedules from controller to controller for faster setup
- View and edit irrigation schedules offline
- View controller event logs and share with other members
- Assign images and rename stations and controllers
- Add a passcode to each controller for additional security

BATTERY-POWERED IRRIGATION

Is Convenient and Comfortable with the NODE-BT

The NODE-BT is synonymous with reliability and trusted performance.

Install the waterproof controller wherever AC power is unavailable:

- Agricultural landscapes
- Highway and street landscapes
- Nurseries and parks
- Construction sites
- LEED buildings and green roofs
- Raised landscapes
- Greenhouses and hydroponics
- Mitigation projects
- Temporary irrigation

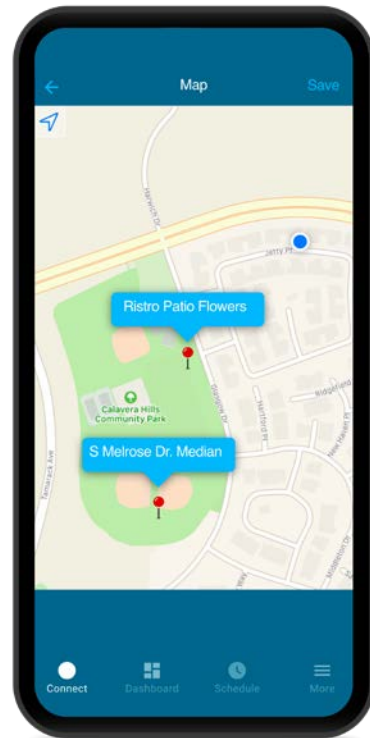

CONVENIENT APP TOOLS

Reduce Troubleshooting Time and Speed Up Service

Set Battery-Change Reminders

Pin Controllers on a Map for Faster Location

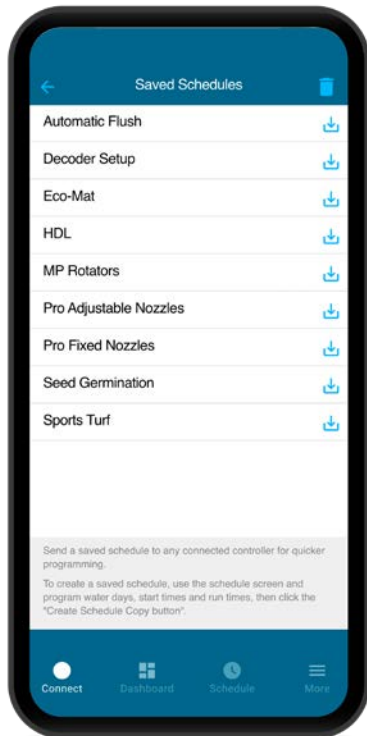

DC controllers inevitably require periodic battery replacement. With the NODE-BT App, you can easily recall maintenance records and note the last battery-change date. To ensure timely service intervals, you can set reminders to replace batteries at each controller every 3, 6, 9, or 12 months.

The NODE-BT Controller makes maintenance easier! When on-site, use the NODE-BT App to drop a location marker pin next to the valve box. When you return to the site, you can quickly locate the exact valve location via GPS.

FLEXIBLE SCHEDULING FEATURES

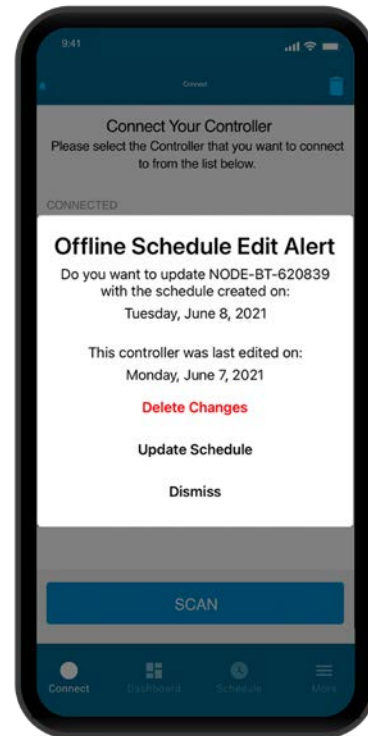

Give You Total Control Away from the Site

Copy & Paste Schedules to Any Controller

Speed up NODE-BT programming with preset schedules that are transferable to any controller in seconds. This ability reduces new controller setup time using preset Start Times, Run Times, and Water Day configurations for sites that have identical landscapes, allowing installers to bypass these steps and continue with other priorities. Preset schedules include custom-named stations and programs, Seasonal Adjust triggers, and Cycle and Soak settings.

View & Edit Schedules Offline and Deploy When Convenient

Use the NODE-BT App to view previously connected controller irrigation schedules and make full program changes offline. When you return to the site, quickly connect and deploy presaved changes for ultimate convenience.
