

What's New 2025

Hunter[®]

Enhancing Our Commitment to Partnership and Innovation

Everything we do at Hunter Industries is rooted in innovation. From small residential installations to fully automated smart cities, our teams continually develop solutions to help you deliver water as efficiently and sustainably as possible.

WIRELESS VALVE LINK SYSTEM

SIMPLE, WIRE-FREE CONNECTIONS

Running wire from the controller to field valves can be time-consuming, labour-intensive, and expensive. The Hunter Wireless Valve Link System uses LoRa® Technology so you can easily connect valves without running additional wires or cutting into hardscape.

Key Benefits

- Works with Hunter ICC2 and HCC Controllers and is compatible with Centralus™ and Hydrowse® Software
- Adds up to 54 valves (+P/MV) up to 650 m line-of-sight or more with a Repeater
- License-free LoRa Technology enables wireless communication directly to the valve box — no copper field wiring required

The LoRa® Mark is a trademark of Semtech Corporation or its subsidiaries.

HUNTER 360 SOFTWARE

ADVANCED IRRIGATION MANAGEMENT FOR NETWORKS

Hunter 360 is a comprehensive, map-based platform for commanding Hunter ACC2 and ICC2 Controllers along with dedicated weather stations. The locally hosted package is designed to function as a standalone irrigation control platform that easily connects to larger automation systems for reporting purposes. It does not require internet connectivity.

Key Benefits

- Comprehensive, on-premises hosted irrigation control platform for network systems
- Works with unlimited number of Hunter ACC2 and ICC2 Controllers and weather sources
- Offers complete, real-time communications and reporting

Advanced Solutions That Simplify Irrigation

Managing multiple irrigation systems and precisely controlling uniformity and distribution are constant challenges. Fortunately, new app features and nozzle family extensions make it a whole lot easier.

HYDRAWISE® APP

UPDATED, USER-FRIENDLY DESIGN THAT'S EASY TO NAVIGATE

Managing Hunter irrigation systems remotely is now faster and easier than ever with the new Hydrowise App! Packed with new functions and cutting-edge technologies, it combines a better experience with detailed irrigation data to help users understand exactly what's happening with their irrigation.

Key Benefits

- All recent activity is visible on the home screen
- Simplified menu makes navigation easier
- Expanded reporting with overview summary provides deeper insights

MP ROTATOR® MP-820 NOZZLE

NEW MP-820 NOZZLE EXPANDS COVERAGE ACROSS THE MP800 FAMILY

The new MP-820 Nozzle offers coverage of 4.6 to 7.3 m, expanding the radius range of the 20 mm/hr matched precipitation rate MP800 Family from 1.8 up to 7.3 m.

Key Benefits

- Simplify irrigation design and add flexibility with automatic matched precipitation rate of 20 mm/hr
- Maximise water efficiency with reduced runoff and misting from strong, wind-resistant streams
- Achieve long-lasting, reliable performance with the debris-resistant, double-pop feature

Innovative Options for Reducing Water Waste

Maximise system performance with controllers that feature built-in flow control and highly efficient nozzles that offer matched precipitation and a high-uniformity spray pattern.

ICC2 CONTROLLER WITH FLOW

AVOID RUNOFF AND SAVE WATER

Station-level flow monitoring is now available for standalone ICC2 Controllers! Protect your landscape from water waste and hydraulic failures with this versatile and affordable control system.

Key Benefits

- Learn flow by station, view flow rates in real-time, enable automatic high- and low-flow detection and shutdown
- Compatible with both HC Flow Meter and HFS Flow Sensors
- Number of stations: Conventional: 8 to 38 (plastic), 8 to 54 (metal and pedestals); With two-wire EZDS or Wireless Valve Link: up to 54 (all enclosure options)

PRO HIGH-EFFICIENCY NOZZLES

NEW PRO HIGH-EFFICIENCY NOZZLES IMPROVE WATER EFFICIENCY

Adjustable arc spray nozzles with high uniformity and matched precipitation maximise water efficiency in spray sprinkler applications.

Key Benefits

- High efficiency performance from a high-uniformity spray pattern
- Matched precipitation of 40 mm/hr from 2.4 m to 5.2 m across the 0° to 360° adjustable arc range
- Colour-coded with natural hues that blend seamlessly with the landscape and provide easy field identification

Website hunterindustries.com | Customer Support +1-760-752-6037

Helping our customers succeed is what drives us. While our passion for innovation and engineering is built into everything we do, it is our commitment to exceptional support that we hope will keep you in the Hunter family of customers for years to come.
