

- 01 **Kink resistant:** Flexible enough to bend in tight spaces, yet resists kinking
- 02 **Easy to grip:** Textured surface offers easy handling, even when wet
- 03 **Built to last:** Low-density polyethylene tubing stands up to harsh environments

## FlexSG TUBING

### *Durable, Soft-Grip Tubing Resists Kinking and Prevails in Harsh Environments*

Hunter FlexSG Tubing is engineered to resist kinking and provide a reliable connection from the fitting to the sprinkler. Constructed of low-density, polyethylene material, it withstands harsh environments for excellent long-term performance. Its flexibility and soft texture make it easy to grip in wet conditions for simple installation and maintenance.

## FlexSG TUBING FEATURES & SPECIFICATIONS

### Key Benefits

- Linear, low-density polyethylene material resists kinking yet remains flexible enough for tight bends
- Soft texture provides a no-slip grip in wet conditions
- Durable construction handles high pressure and tough system conditions

### Specifications

- Operating pressure: up to 5.5 bar; 550 kPa
- Temperature range: -18° to 60°C
- Inside diameter: 1.2 cm
- Outside diameter: 1.8 cm

### Models

**FlexSG**  
30 m (100') roll

**FlexSG-18**  
45 cm (18") precut lengths

## FlexSG TUBING ACCESSORIES FEATURES & SPECIFICATIONS

### Key Benefits

- Robust, acetal material offers long-term durability
- Twist-in design makes installation quick and easy when used with FlexSG Tubing and other compatible brands
- Large, spiral barbs increase in size to create a leak-free connection, even at high pressures
- Colour-coded accessories make it easy to identify specific components in the field

### Specifications

- Operating pressure: up to 5.5 bar; 550 kPa
- Temperature range: -18° to 60°C

### Models

**HSBE-050**  
½" male thread x spiral barb elbow

**HSBE-075**  
¾" male thread x spiral barb elbow

Quickly and reliably connect Hunter sprays and rotors to FlexSG Tubing.
