For Toro®
Golf Rotors**

Need a low cost solution to extending the life of your aging Toro® irrigation system? Hunter solves the problem with the introduction of the new RT Series. Designed specifically to retrofit Toro® 1" inlet golf rotors, the RT is a simple conversion kit that replaces the "heart" of your old sprinklers, extending the life for years to come. The RT converts your sprinkler into a closed-case rotor for greater external contamination resistance and, with a 3" pop-up, the nozzle stream clears the turf to minimize wet spots

around the head. Thanks to its quick and easy installation, you'll be able to reap the benefits of improved coverage (including better pattern control and less overspray) in just minutes. Four different models are available with a wide range of water efficient nozzles, the best that the industry has to offer, ready to meet your specific course conditions. Upgrade your golf irrigation system without disrupting a single piece of turf. The Hunter RT is the no-dig retrofit that provides better performance...and that's no bull.

FEATURES & BENEFITS

Quick and easy conversion to the latest rotor technology

A low cost, reliable and efficient upgrade that will extend the life of existing irrigation systems

Hunter RTs adapt to all 1" inlet Toro® golf rotors

Wide range is perfect for 630s, 730s and 760s; Hunter G60 Series is the only truly compatible replacement for discontinued 660

Maximum efficiency at very low pressures (G60 Series versions)

Pumps can't keep up? Extreme elevations? Overextended irrigation systems? The G60RT is a low pressure problem solver

Convert current sprinklers into closed-case rotors

Helps prevent stick-ups and leaking seals caused by external contaminants and top-dressing

Adjustable arc and full-circle models

Meet your every course requirement with 40°-360° adjustable arc or 360° full-circle models

Created by the world leader in gear-driven rotors

Performance, reliability and long life assured by the company that has set the standards for rotor quality

Hunter RT: Quick, Clean and Easy to Install!

1. Remove internal assembly of existing sprinkler.

2. Insert the retrofit adapter sleeve. Press the snap ring into position to secure adapter.

3. Thread on adapter cap and securely tighten.

4. Insert pop-up riser assembly.

5. Snap the retaining ring in place.

6. A clean & simple conversion in minutes!

PRODUCT EXPLANATION

EXAMPLE: **G70RT**

MODEL

- G60RT = Full-Circle Riser With Nozzle Set
- G65RT = Adjustable Arc Riser With Nozzle Set
- G70RT = Full-Circle Riser With Nozzle Set
- G75RT = Adjustable Arc Riser With Nozzle Set

Note: For nozzle selections and performance, reference the G60 literature (GLIT-001) G70 literature (GLIT-002), G860 literature (GLIT-036), G870 literature (GLIT-032), G880 literature (GLIT-042).
