

GOLF IRRIGATION SOLUTIONS

For Partial or Total Renovations

GOLF IRRIGATION
Built on Innovation®

Hunter®

UNMATCHED SOLUTIONS THAT DELIVER EXACTLY WHAT YOU NEED

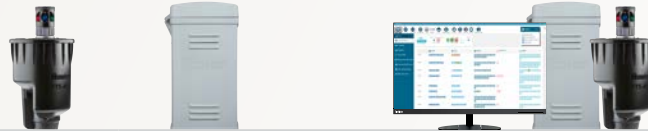

At Hunter Golf, we're proud to set the standard for irrigation efficiency. With premier products like our best-in-class Pilot® Control Network and TTS-800 Series Golf Rotors, we offer the field-proven tools you need to ensure your course is always ready for play. Frequent use, dirty water, and tough conditions combine over time to wear out your system. Whether you need a complete or partial renovation, efficient Hunter Golf irrigation solutions deliver reliable performance to ensure playability while helping you save water, labor, and money.

A STEP-BY-STEP APPROACH

This solution is perfect if you have a limited budget or only need to upgrade part of your system. With Hunter's flexible options, it's easy to retrofit rotors or controllers only.

TOTAL SYSTEM UPGRADE

This option allows for the installation of innovative two-wire technology to optimize run times with less wire while saving water and labor. If the previously installed wire is still in good condition, a complete conventional system upgrade is also possible.

UPGRADE TYPE	ROTORS	CONTROLLERS	CONVENTIONAL SYSTEM	TWO-WIRE SYSTEM
Rotors with Solenoids Only	●		●	
Rotors with Two-Way Modules				●
Pilot Field Controllers		●	●	
Pilot Integrated Hubs				●
Pilot Command Center Software		●	●	●

It Pays to Renovate

Now is the perfect time to upgrade your golf irrigation system with future-ready solutions from Hunter Industries that set the standard for innovation and performance. Today's rotors are more powerful and efficient with better water distribution. The Pilot Control Network provides more efficient scheduling, easier upkeep, and unmatched flexibility.

A Proven Return on Your Investment

We work directly with golf courses to conduct comprehensive irrigation system audits. These tests demonstrate how Hunter systems can maximize water savings, reduce operating costs, and enhance the golf experience for players and course managers alike.

hunter.info/audit

HUNTER SYSTEMS DELIVER AN AVERAGE WATER SAVINGS OF 17% OVER THE COMPETITION.

We'll audit your system to help you save water, reduce costs, and enhance the golf experience for players and course managers. Find out how much water you could save with our free Golf Water Savings Calculator.

TTS-800 Series Golf Rotors

Achieve maximum distribution uniformity with our reliable and efficient TTS-800 Series Golf Rotors. Routine maintenance is easy with no-dig Total-Top-Serviceability and the largest flange compartment in the industry.

- Proprietary Filter Sentry® Mechanism cleans the filter with every cycle to prevent clogs
- Access all components from the top of the rotor, including Pilot Two-Way Modules and DBRY-6 Splice Connectors
- Wirelessly program Pilot Two-Way Modules with the handheld ICD-HP Programmer

G-800 and B Series Golf Rotors

Whether you need simple solutions or the latest technology, Hunter golf rotors offer dependable performance to push past the obstacles of day-to-day irrigation management. With the same robust internal riser as the TTS-800 Series, choose from G-800 Series or B Series rotors for additional flexibility in irrigation design.

- Exclusive PressurePort™ Nozzle Technology maximizes distribution uniformity
- High-torque gear drives are the strongest on the market to power through tough conditions
- Extensive nozzle selection with radius options from 18 to 97'

Pilot Command Center Software

With intuitive Pilot Command Center Software, you can create hydraulically safe and efficient daily watering plans faster than ever. Manage your course using minutes, inch application, or local ET data.

- Manage thousands of individually controlled sprinklers in seconds
- Make daily watering adjustments with just a few clicks on a single screen
- Save time and maximize resources with POGO Visual Insight Integrations that show you the exact, real-time conditions of your turf

Pilot Field Controllers

These standalone field controllers let you manage up to 80 stations with 32 automatic schedules and eight start times per schedule. For a fully automated, flow-optimized system, connect the controllers with Pilot Command Center Software via wirelessly or via hardwire.

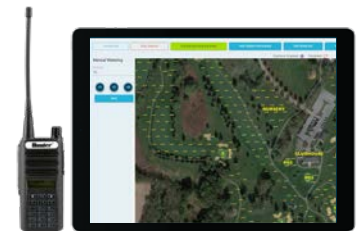

- Control on-off-auto station switches with Exclusive Safe-Toggle™ Technology
- Suspend irrigation for up to 30 days or indefinitely with One-Touch Rain Shutdown
- Pause watering at any time using One-Touch Safe-Pause™ Technology

Pilot Integrated Hub Systems

Save money on wire and labor while adding control and diagnostics with true two-way communication. Pilot Integrated Hub Systems use less wire than other systems and require fewer splices, valve boxes, and concrete pads. This results in lower costs, faster installation, and easier system diagnosis and upkeep.

- Easily manage hubs from a central location with Pilot Command Center Software
- Systems can be easily expanded as needed by adding Pilot Two-Way Modules (TWMs)
- TWMs let you operate up to 999 stations approximately 1,000' from a single hub

MultiTalk™ Technology

With proprietary MultiTalk Technology, the Pilot Control Network provides more versatility than any other system in the industry. The technology allows flexibility in wiring by combining Integrated Hubs and Field Controllers on the same system.

- Easily switch between wireless and hardwired communication
- Provides multiple remote-control options via the handheld StraightTalk™ Maintenance Radio, phone, or tablet
- Utilize multiple frequencies in wireless modules to repeat signals and forward communications to controllers in distant locations

SUCCESS STORIES

We've invested decades of research and millions of dollars to develop industry-leading golf irrigation solutions that help you save time, money, and resources.

“I am delighted with the Hunter system. It has proven to be a reliable product and has not let me down. Working with the team at Hunter has been great.”

- Magnus Ljungman, Course Manager
Österåkers Golfklubb, Åkersberga, Sweden

“Hunter’s Pilot Control Network provided the performance, flexibility, and ease of use we were looking for, and their service before and after the sale was truly outstanding.”

- Brandon Arens, Director of Agronomy
The Prairie Club, Valentine, Nebraska, USA
