

IRRIGATION SOLUTIONS FOR SPORTS FIELDS

Hunter®

Keeping sports fields ready for play can be a challenge — especially at professional stadiums, community parks, and other high-use facilities.

From football to field hockey, Hunter Industries offers a wide range of proven sports turf irrigation solutions that ensure surfaces remain intact, playable, and safe in both natural and synthetic settings. **Whether you need to install a new system or upgrade your existing one, we have a solution for you!**

I-SERIES ROTORS

Efficient and reliable Hunter I-Series Rotors are built to conquer the most demanding conditions. With powerful gear drives and a wide radius range, these compact, highly durable models are available in stainless steel with built-in check valves and a wide selection of high-performance nozzles. They work hard day in and day out to keep every field ready for play.

I-20, I-25, and I-40 Rotors

These tough commercial rotors get the job done with upgraded features for tackling any challenge.

- Patented automatic arc return resets the turret if the original pattern is vandalized
- Non-strippable drive mechanism prevents damage if the turret is turned in the opposite direction of travel
- QuickCheck™ Arc Mechanism offers fast arc adjustment
- Part- and full-circle in one model expands installation flexibility and reduces inventory
- Color-coded nozzles simplify field identification

hunter.info/Rotors

hunter.info/I80

I-80 Rotor

The high-torque I-80 Rotor is the most technologically advanced commercial rotor available.

hunter.info/I90

I-90 Rotor

With a large radius, the powerful I-90 Rotor boasts the longest throw of any natural turf rotor.

- Exclusive Total-Top-Service (TTS) design provides convenient no-dig servicing (I-80)
- Forward-facing triple nozzles or opposing triple nozzles create uniform nozzle profiles
- QuickCheck Arc Mechanism offers fast arc adjustment
- Part- and full-circle in one model expands installation flexibility and reduces inventory
- Color-coded nozzles simplify field identification

SYNTHETIC TURF ROTORS

ST-1600-KIT Synthetic Turf Kit

Designed for cooling, cleaning, and preparing synthetic turf sports fields for play, the Hunter ST System simplifies irrigation by combining long-range rotors, unique swing joints, durable valves, and nearly indestructible vaults into an all-in-one solution.

- With a powerful throw radius up to 165', the ST-1600 is field-tested and time-proven to be the most reliable gear-driven synthetic turf rotor on the market
- Construction-grade fiberglass shell provides easy access to all irrigation components for quick servicing and maintenance
- The unique Infill Barrier System creates a safe transition where the rotor pops up for seamless integration with the field

hunter.info/ST1600KIT

QUICK COUPLERS AND SNAPLOK™ COMBO KITS

For spot watering on the field, install a Hunter Quick Coupler to cool down small areas of synthetic turf. Pair it with a SnapLok Combo Kit to increase performance and stabilization.

Quick Coupler

- 100% interchangeable with major brands for seamless retrofits
- Red brass and stainless steel construction provide maximum durability
- Optional winged stabilization and Acme key connection for sturdy, vandalproof operation

SnapLok Combo Kit

- Heavy-duty, prefabricated PVC swing joints with O-ring seals ensure proper positioning and optimal performance
- Choice of 12" or 18" lay arm lengths to suit any project
- Unique SnapLok outlet with brass threads offers unmatched support and durability

hunter.info/QuickCoupler

HUNTER VALVES

ICV Valve

Available in a wide variety of sizes, the commercial-grade ICV Valve offers unmatched reliability and seamless operation to power through tough challenges like high pressures and fluctuating flow rates.

- Glass-filled nylon construction provides a high-pressure rating with reliable operation
- Double-beaded diaphragm with support ring ensures leak-free performance
- Fabric-reinforced EPDM diaphragm and seat ensure top-quality performance in all water conditions
- Captive triple-tool bonnet screws allow easy servicing
- Encapsulated solenoid with captive plunger used on every valve provides hassle-free service

HUNTER CONTROLLERS

Our expansive lineup of irrigation controllers offers user-friendly features and smart controller water-saving options built to fit any sports field application. Our modular designs, expandable stations, and cloud connectivity make it easy to manage large projects from anywhere.

HCC Controller

When connected to industry-leading Hydrowise® Software, the Wi-Fi enabled HCC Controller uses Predictive Watering® Technology to make automatic schedule adjustments based on local weather data.

hunter.info/HCC

ICC2 Controller

This versatile and reliable control system can run conventional, two-wire, or hybrid operations. Upgrade to mobile-friendly Centralus™ Software for cloud-based control and monitoring from anywhere.

hunter.info/ICC2

- Modular design allows for rapid expansion up to 54 stations with two-wire technology
- Provides standard programming with multiple independent programs and start times
- Run multiple programs at the same time for maximum efficiency
- Total system flow monitoring, reporting, and notifications when connected to cloud software
- Compatible with the Hunter ROAM XL Remote for long-range manual operation

EZ Decoder System

With the revolutionary EZ Decoder System, you get all the advantages of two-wire installations with simpler, more cost-effective technology. Programmable EZ Decoders can be easily installed and maintained using the EZ-DT Diagnostic Tool.

ROAM XL Remote

The compact, high-powered ROAM XL Remote features a simple user interface with 128 programmable addresses. Use it to remotely access any Hunter controller with a SmartPort® Wiring Harness for long-range manual operation up to 2 miles without a smartphone.

hunter.info/EZDS

hunter.info/ACC2

ACC2 Controller

Compatible with Centralus Software, the intelligent and flexible ACC2 Controller is the most advanced commercial controller available. Its powerful transformer allows you to run up to 14 valves, giving you maximum efficiency for your largest projects.

- Modular design allows for rapid expansion up to 54 stations
- Provides standard programming with up to 32 independent programs and 10 start times per program
- Block function lets you group stations and consolidate large systems
- Built-in Solar Sync[®] Sensor logic supports smart water savings
- Real-time flow monitoring detects and diagnoses leaks in up to six flow zones

hunter.info/ACC2Decoder

ACC2 Decoder Controller

This robust controller uses two-wire decoder technology to manage hundreds of stations, using standalone or cloud-based control with Centralus Software. Its powerful Flow Manager maximizes watering in the shortest possible timeframe for maximum efficiency.

- Modular design allows for rapid expansion up to 225 stations with two-wire ICD Decoders
- Provides standard programming with up to 32 independent programs and 10 start times per program
- Block function lets you group stations and consolidate large systems
- Built-in Solar Sync Sensor logic supports smart water savings
- Real-time flow monitoring detects and diagnoses leaks in up to six flow zones

ICD Decoder

Compatible with ACC2 Decoder Controllers, premium two-wire ICD Decoders are ideal for sports field applications with high station counts. Integrated surge protection eliminates the need for extra devices.

HUNTER GOLF ROTORS

Our best-in-class golf rotors deliver unmatched reliability in applications well beyond fairways and greens. When installed around the perimeter of sports fields, they ensure healthy turf and safety for athletes. Featuring the strongest gear drives in the industry, they set the standard for water efficiency, distribution uniformity, and long-lasting performance.

hunter.info/GT885

TTS-800 Series Golf Rotors

With multiple models to choose from, our premium lineup of golf rotors offers innovative features that provide maximum uniformity and longevity.

- Total-Top-Serviceability with an extra-large, easy-access flange makes upkeep a breeze
- Exclusive PressurePort™ Technology maximizes distribution uniformity
- Proprietary Filter Sentry® Mechanism cleans the filter with every cycle to prevent clogs
- Wirelessly program Pilot® Two-Way Modules with the ICD-HP Programmer

hunter.info/G885

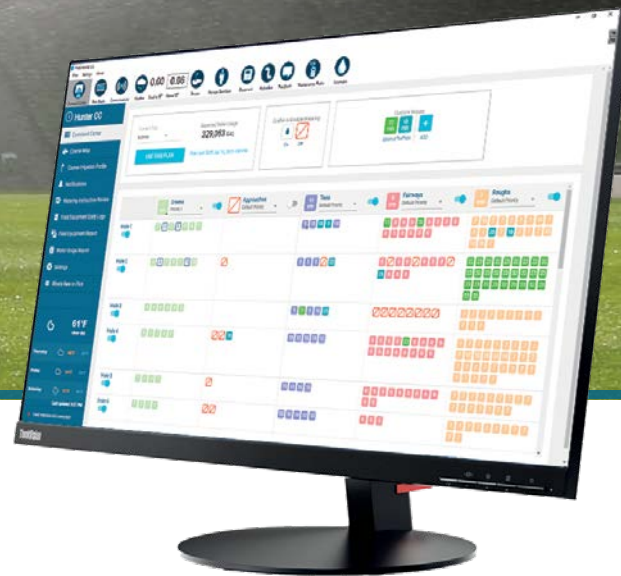

G-800 Series Golf Rotors

With patented gear drives and powerful cores, this advanced line of rotors is one you can count on.

- Dual-trajectory nozzle capabilities ensure even watering
- Exclusive PressurePort Technology maximizes distribution uniformity
- QuickSet360 Arc Mechanism lets you set your adjustable arc quickly and easily
- Proprietary Filter Sentry Mechanism cleans the filter with every cycle to prevent clogs

HUNTER PILOT CONTROL NETWORK

Pilot Command Center Software

With intuitive, next-generation Pilot Command Center Software, you can create hydraulically safe and efficient daily watering plans faster than ever before.

- Manage thousands of individually controlled sprinklers in seconds
- Make daily watering adjustments with just a few clicks
- Balance watering demands with flow capacities to determine the most efficient watering cycles possible
- Map your field, then run water by clicking the station symbol on the map
- Save time and maximize resources with POGO Visual Insight Integrations* that show you the exact, real-time conditions of your turf

* Hardware sold separately at pogoturfpro.com

hunter.info/PilotCCS

Pilot Integrated Hub Systems

Save time and money from day one! Pilot Integrated Hub Systems use less wire than other systems and require fewer splices, valve boxes, and concrete pads. This results in lower costs, faster installation, and easier system upkeep.

- Easily manage hubs from a central location with Pilot Command Center Software
- Systems can be easily expanded with minimal digging by adding Pilot Two-Way Modules (TWMs)
- TWMs let you operate up to 999 stations approximately 2 miles from a single hub
- Wirelessly program TWMs using the ICD-HP Programmer
- Compatible with PilotFCP Utility for remote scheduling using a computer or tablet

Creating Your Design

Not sure how to get started? Download our free sports field plans, available online in DWG and PDF formats. Then use these handy tools to ensure proper coverage as you create your own designs.

hunter.info/SportsField

1. Scan the QR code to access our website.
2. Click on the desired sports field plan in the right-hand column.
3. Select the desired plan from the chart and begin designing.

Proven solutions for the most demanding applications

Whether you're installing irrigation in a youth sports field or a stadium that seats thousands of spectators, Hunter has a solution to meet your watering needs. With more than 40 years of experience delivering efficient, durable, and reliable sports turf irrigation innovations, our best-in-class products are engineered to deliver long-lasting performance in any application, no matter how demanding.
